Introduction

Purpose & Description

A movie searching website is designed with the purpose of allowing users to search and discover information about movies in a convenient and efficient manner. The website typically provides various search options, such as title, and year, to assist users in finding the movies they are interested in. The website may also offer ratings, to help users make informed decisions about which movies to watch. The primary objective of a movie searching website is to provide a comprehensive database of movies to users, allowing them to search, browse, and discover movies and related information.

I included the functionality of when a user registers to the website it not only registers the user but logs them into the website without needing to go to a different page and get the user to put their login credentials. This is a small and subtle change but I feel makes the experience more seamless and coherent for the user and more likely to stay on the site.

In a website that will have a fair amount of information on it I'm looking for a website to consider eye strain by making it a dark theme and pleasing to look at. Reading on a bright background can cause eye strain and even headaches, especially for those who spend long hours in front of a screen. A dark theme on websites can reduce eye strain, as it produces less glare and is easier on the eyes. A website dark theme can offer several potential benefits, including reducing eye strain, saving battery life, enhancing readability and aesthetics.

The image displays two screenshots of a movie searching website, likely demonstrating a dark mode theme. The top screenshot shows a welcome message: "WELCOME TO THE Movie SEARCHING WEBSITE! SEARCH A MOVE I DEAR you!" with a "CLICK ME :)" button. Below this are two movie posters: one for "HAAAH IDK WHAT TO SAY" (Legit Just looked up NEON POSTER) and another for "THIS COULD BE A MOVIE." (EXCEPT ITS NOT, THEY PRODUCE MUSIC.). The bottom screenshot shows a movie detail page for "A TALE OF SPRINGTIME". It includes basic movie info (Year Released: 1990, Runtime: 108 min), genres (Comedy, Drama, Romance), country (France), box office (\$0 USD), and links to IMDB, Rotten Tomatoes, and Metacritic. To the right is a poster for the film, featuring a couple in a park. Below the poster is a detailed plot summary: "SIMPLE CONVERSATIONS ENGENDER COMPLICATED HUMAN INTERACTIONS. JEANNE IS OPEN AND EVEN-TEMPERED. A PHILOSOPHY TEACHER AT A LYCÉE. HER FIANCÉ IS AWAY AND SHE DOESN'T WANT TO STAY AT HIS MESSY FLAT; SHE'S LOANED HER TO A COUSIN. SO ..." At the bottom is a table of cast and crew:

Name	Category	Characters
Marc Lelou	actor	Gildas
Anne Teyssèdre	actress	Jeanne
Hugues Quester	actor	Igor
Florence Darel	actress	Natacha
Eloïse Brion	actress	Eve

Completeness and Limitations

I completed all but 1 – 2 of the requirements which is paginated and infinite Scrolling on the Movie List page due to a lack of time. All other features are implemented along with no excessive querying of the server while retaining feature parity. In addition I try to increase the user experience by reducing the amount of time a user needs to input their authentication details while registering and logging in. This is by logging the user in straight away after registering no second page. The chart data is present for the IMDB scores in People's data however the Ag grids do have some formatting issues. All authentication with refresh tokens is added, this works by checking the response from a authenticated endpoint and if it has expired it attempts to refresh from there the relevant page is shown. Id like to say the code is laid out well along with the folder structure and my use of callback function allows for better navigation and readability.

Use of End Points

/movies/search

This endpoint allowed for the search of movies in the data base while also allowing filtering for year and title containing text

The screenshot shows a web application interface. At the top, there is a header with a home icon, the email address BRAYDAN@BRAYDAN.GMAIL.COM, and navigation links for MOVIES and LOGOUT. Below the header is a search form titled "Movies Containing" with a text input field containing "STAR WARS". Underneath the search form is a "From Date" dropdown menu and a "SEARCH" button. The main content area displays a table of movie results:

Title	Year	Imdb Rating	Rotten Tomatoes Rating	Metacritic Rating	Classification
Star Wars: Episode I - The Pha...	1999	6.5	51	51	PG
Star Wars: Episode II - Attack o...	2002	6.6	65	54	PG
Star Wars: Episode III - Reveng...	2005	7.6	79	68	PG-13
Star Wars: The Clone Wars	2008	5.9	18	35	PG
Star Wars: Episode VII - The Fo...	2015	7.8	93	80	PG-13
Star Wars: Episode VIII - The L...	2017	6.9	91	84	PG-13
Star Wars: Episode IX - The Ris...	2019	6.5	52	53	PG-13
Rogue One: A Star Wars Story	2016	7.8	84	65	PG-13
Solo: A Star Wars Story	2018	6.9	69	62	PG-13

/movies/data/{imdbID}

This endpoint allows an ID of a specific movie to get extra information about it

The screenshot shows detailed information for the movie "Star Wars: Episode III – Revenge of the Sith". The movie title is at the top, followed by release year (2005) and runtime (140 min). Below that are genres: ACTION, ADVENTURE, and FANTASY. To the right is a movie poster for "Star Wars: Episode III – Revenge of the Sith". Technical details include IMDB rating (7.6), Rotten Tomatoes rating (79), and Metacritic rating (68). A plot summary below the poster states: "THREE YEARS INTO THE CLONE WARS, OBI-WAN PURSUES A NEW THREAT, WHILE ANAKIN IS LURED BY CHANCELLOR PALPATINE INTO A SINISTER PLOT TO RULE THE GALAXY." At the bottom is a table of credits:

Name	Category	Characters
David Tattersall	cinematographer	
Hayden Christensen	actor	Anakin Skywalker
Natalie Portman	actress	Padmé
Ewan McGregor	actor	Obi-Wan Kenobi
Samuel L. Jackson	actor	Mace Windu
George Lucas	director	
John Ostrander	writer	
Ian McEwan	writer	

/people/{id}

This endpoint allows an ID of a specific person to get extra information about them

The screenshot shows a detailed breakdown of Samuel L. Jackson's acting roles across various movies. The data is presented in a table format:

Role	Movie Name	Character	IMDb Rating
actor	Kiss of Death	Calvin Hart	5.9
actor	The Great White Hope	Rev. Fred Sultan	5.5
actor	The Long Kiss Goodnight	Mitch Leavens	6.8
actor	A Time to Kill	Carl Lee Hailey	7.5
actor	One Flew Over the Cuckoo's Nest	Trevor Gernreich	5.9
actor	Love Letters	Lester Riddick	7.2
actor	Hard Eight	Steve	7.2
actor	Jackie Brown	Oskar Bobb	7.5
actor	Sphere	Harry	6.1
actor	The Negotiator	Denny Roman	7.3
actor	Star Wars Episode II: Attack of the Clones	Moive Walker	7.0
actor	Drop Dead Sexy	Travis Wadler	5.5
actor	Man on Fire	Calisto Terry Children	6.4
actor	Shall	John Shaft	6
actor	The Coven's Valentine	Romulus	5.8
actor	Unbreakable	Elijah Price	7.3
actor	Formula S1	Drew McElroy	6.3

Below the table is a bar chart titled "Rating All x Games" showing the distribution of IMDB ratings for his performances. The x-axis represents rating ranges (0-1, 1-2, 2-3, 3-4, 4-5, 5-6, 6-7, 7-8, 8-9, 9-10) and the y-axis represents the count of roles in that range. The distribution is heavily skewed towards higher ratings, with the highest frequency in the 6-7 range.

/user/register

This endpoint allows for a user to register an account on the site for further features

The registration form consists of three input fields: "EMAIL", "PASSWORD", and "CONFIRM PASSWORD". Below the fields is a "REGISTER" button. At the bottom of the page, there is a footer navigation bar with links: WATER BOTTLES, MORE RANDOM 😂, IDK, WHAT, IM, SAYING, and NON OF THESE WORK LOL.

/user/login

This endpoint allows for a user to login to an already registered account on the site to access data behind authentication

/user/refresh

This endpoint does not have an associating page on the website as its used in the background away from the users knowledge. The Refresh endpoint is used to get new authentication tokens so that when the bearer Token expires they do not need to login with would occur every 10 minutes otherwise. This allows for a better user experience and better security as tokens are constantly changing.

/user/logout

This endpoint does not have an associating page more of a button on the website as its used in the background away from the users knowledge. This allows the user to deactivate the the authentication tokens on there account and also removes all tokens and authentication data from storage.

Modules Used

ag-grid-react

Module to provide fully-featured table components

<https://www.ag-grid.com/react-grid/>

reactstrap

Module to provide all the bootstrap capabilities in a react app

<https://github.com/reactstrap/reactstrap>

chart.js

Module to provide the ability to easily add charts components to react

<https://www.chartjs.org/>

MUI

Module to provide a lot of different icons that are easy to customise

<https://mui.com/>

Application Design

Navigation and Layout

The layout of this site aims to allow the user to navigate the site efficiently and effectively, guiding them through each available endpoints in succession. The beginning of this flow starts at the homepage where a navigation bar, cards are displayed to add style to the application. The main function of the homepage is to provide the user with a point of access to the movie page via the browse button. The part of the website that is the main focus is the movie and people information sections, to get there you enter the movies list view. This is where you can select any movie you choose and to narrow down the search you can Search by text in the title and year of release. After selecting a movie you can go on to see the movie information page. In this view of the movie

Usability and Quality of Design

In general id say the design is well organised with a simple clean layout. For each page the relevant information is shown clearly with good spacing to distinguish between all the information. Due to the limited button in the nav bar and thorough out the site with only the navigation that are really needed with good labelling, id say the navigation is clear and intuitive. The things taken for granted on websites have been implemented here like the home button in the top left taking you back to the home page. In terms of visual consistency, the colours, and basic layout do not change from page to page. There are only 5 colours used in the site and where chosen for a clear dark aesthetic with a calming theme. A single font is used on the site not to confuse readers. The userability of my design is fine for any normal visitor. However the AG grids do have the majority of the styling issues where they are not the correct colours, not the correct size and configured wrong thus having the wrong column size.

Accessibility

- Provide a text equivalent for every non-text element – alternatives to images, symbols, scripts, graphical buttons, sounds, audio and video files and so on.
 - Every image does have a text representation, however this text is not very descriptive of the image and is limited to “poster” or something similar
 - The icons/symbols do not have text representations
 - This is hard to do when you are creating a site with procedural/dynamic content
- For tables, identify row and column headers – clearly differentiated from the data.
 - This is done by default with AG grids and their themes.
 - This makes the grid lists far more readable and easy to see rows and columns
- Avoid causing the screen to flicker.
 - This is mostly eliminated due to all main backgrounds being the same dark colour.
 - This could occur if the styling is removed
 -

Technical Description

Architecture

The layout of my project structure is a very normal Node React Application apart from the “assessment_files” folder which holds document specifically for the written part of this assessment

The src directory is laid out in a very standard way with each folder containing only files that relate to a given task. Such as all files in the components folder are all single parts of a page like the nav bar or footer. The app and index files in the root src directory are the base of the react application. The app.js file contains all the routing for the site so different URL's map to different pages. The Layout.js file describes the default layout of the page with the header at the top, footer at the bottom and the main content like movie list in between.

The components folder holds a bunch of components that could be reused throughout the application without needing to be re-written just imported. Things like year date drop down and the nav bar.

The pages folder holds the content part for each individual page such as the movie list page, it describes how the page looks and puts all the parts of the page together. These pages get the data from the utility functions which will be explained later, from there the data is then parsed and split up with JSX.

The assets folder holds all extra files the application will need in this case it holds an extra style sheet for more styling on top of the App.css one.

The Utilities folder holds a collection of javascript files with function to help to various things like get all the data for the movies and people. The authentication.js file handles and deals with the fetch requests for all authentication requests such as login, logout and refresh. While the localStorage.js file handles all the writing and reading from local storage, and json parsing and stringifying the objects. The MovieApi.js file handles the retrieval of all the movie and person data, while also dealing with all the different responses that could be sent back.

In summary I chose to split the application structure like this so that it would be easy to reuse code and be self explanatory on what each file and folder is used for. Making it easier for debugging and building on this website in the feature.

Test Plan

Task	Expected Outcome	Result	Screenshot/s (Appendix)
Show a list of default movies	Shows a list of movies	PASS	01
Search for movies with a specific year release	Shows movies with specific year release	PASS	02
Search for movies with specific text in the title	Shows movies with specific text in the title	PASS	03
Search for movies with a specific year release and text in the title	Shows movies with a specific year release and text in the title	PASS	04
When selecting a movie from the list, should show a page with information about the movie and a list of all the people associated with the movie.	Takes you to a page about the movie and has a list of people	PASS	05
When selecting on an person, should take you to a page to view information about the person and there career	Takes you to a page about the person and has a information about there career	PASS	06
When Viewing a persons career should also show a quick glance chart of the persons movie ratting	Shows a table of the collated results from rating of all the movies they worked on	PASS	07
When trying to register an account it should check that the email is a valid email.	When checking an email will stop the user form proceeding any further till email is valid	PASS	08
When trying to register an account it should check that the password and confirmation	When checking a password will stop the user form proceeding any further till both passwords	PASS	09

password are the same before proceeding	are the same		
When register is complete it should log me in also	When register is done the site will log you in as well	PASS	10
When register or login is finished, should take you back to the page you came from	When finished login or register will take you back to page previous	PASS	11
When trying to access data from a authenticated endpoint and auth fails, it should attempt to refresh the tokens	When accessing the data with an expired token it refreshes the token and tries to fetch the data again	PASS	12
While logged in the user should ne be able to see the login and register buttons, and only a logout button and vice versa	While the user is logged in only the logout button is visible and before logged in the only the login and register button	PASS	13
When scrolling down in the movie list, once bottom is reached should request more results to create infinite scrolling	The movie list does not fetch more data from the api	FAIL	14

Difficulties / Exclusions / unresolved & persistent errors

The only roadblock I ran into was just learning how react works and moving from the Vanilla Javascript I am use too. After reading the react documentation it was pretty simple to put together this simple application. I was not able to get the infinite scrolling on the movie list, this was due to time constants and the documentation not explaining real world examples. The only bug I can think of would be the lack lustier styling and the ag grids being not themed correctly.

Role	Movie Name	Characters	Imdb Rating	
actor	Boiling Point	Masaki	6.7	

User Guide

Home Page:

From here you can see all the options at the top in the nav bar, this will be present on all pages to make navigation easy. From here you can log in register and go to the move searching pages.

Register:

The register page is where you go to make an account. From here you need to enter a valid email and a password assuring that both password field have the same text in them. Once this has been done clicking the register button will create an account and log you in at the this point youll be put back on the page you when to the register page from.

A screenshot of a dark-themed web application's registration form. At the top right are links for "MOVIES", "LOGIN", and "REGISTER". Below these are three input fields: "EMAIL" containing "BRAYDAN@BRAYDAN.GMAIL.COM", "PASSWORD" containing a masked password, and "CONFIRM Password" containing a masked password. A "REGISTER" button is centered below the inputs. At the bottom of the page is a footer bar with links: "WATER BOTTLES", "MORE RANDOM #%%%", "IDK", "WHAT", "IM", "SAYING", and "NON OF THESE WORK LOL".

Login:

The login page is where you go if you are not logged in but already have an account. From here you enter you password and email, if valid then you be logged in and put back to the page you came from.

A screenshot of a dark-themed web application's login form. At the top right are links for "MOVIES", "LOGIN", and "REGISTER". Below these are two input fields: "EMAIL" containing "BRAYDAN@BRAYDAN.GMAIL.COM" and "PASSWORD" containing a masked password. A "LOGIN" button is centered below the inputs. At the bottom of the page is a footer bar with links: "WATER BOTTLES", "MORE RANDOM #%%%", "IDK", "WHAT", "IM", "SAYING", and "NON OF THESE WORK LOL".

Movies Searching

On this page you will be presented with a form to put in search parameters, and a list of default searched movies. Typing in text in the search field and searching will preset only movies with the text somewhere in the title and changing the date and searching will search for movies with this release date. By click on a movie in the list you can go to more information about this movie.

Movie Information:

On this page the movie you selected on the movie list page will be shown with extra details about the movie, giving you easy access to the information about this movie, along with a list people associated with movie like actors director and writer. Clicking on a person will take you to a page with more information about this person.

DUNSTON CHECKS IN

YEAR RELEASED: 1996
RUNTIME: 88 MIN
GENRES: Adventure Comedy Family
COUNTRY: United States
Box Office: \$9,871,065 USD
INTERNET Movie Database: 5.3
ROTEN TOMATOES: 17
METACRITIC: 54

A YOUNG BOY BEFRIENDS A LARCENOUS ORANGUTAN IN A LUXURY HOTEL.
OPENING JANUARY 13

Name	Category	Characters
Miles Goodman	composer	
Jason Alexander	actor	Robert Grant
Faye Dunaway	actress	Mrs. Dubrow
Eric Lloyd	actor	Kyle Grant
Rupert Everett	actor	Lord Rutledge
Ken Kwapis	director	
John Hopkins	writer	
Bruce Graham	writer	
Todd Black	producer	
Joe Wizan	producer	

Person Information:

On this page you will have to be logged in with a non expired refresh token. From here you will be presented with a bit of information about the persons movies career like a graph of the collated movie rating the person was apart of and a list of the movies they were apart of, by clicking one of these movies you will be taken back to the movie information page about that movie .

Logout:

By clicking the logout button in the nav bar you will be logged out of your account and taken to the home page.

Appendix

Screenshot 1

The screenshot shows a dark-themed web application for movie search. At the top, there's a header with a house icon, the email address 'BRAYDAN@BRAYDAN.GMAIL.COM', and links for 'MOVIES' and 'Logout'. Below the header is a search bar with the placeholder 'Movies Containing' and a dropdown menu labeled 'From Date'. A 'SEARCH' button is located below the search bar. The main content area displays a table of movie results:

Title	Year	Imdb Rating	Rotten Tomatoes Rating	Metacritic Rating	Classification
Kate & Leopold	2001	6.4	52	44	PG-13
The Other Side of the Wind	2018	6.7	83	78	R
A Tale of Springtime	1990	7.1	86		PG
Moon 44	1990	5	0	39	R
The Match Factory Girl	1990	7.5			Not Rated
Three Men and a Little Lady	1990	5.4	40	51	PG
Boiling Point	1990	6.7	94		Not Rated
The Adventures of Ford Fairlane	1990	6.4	25	24	R
Agneepath	1990	7.6			Not Rated

Alice	1990	6.6	71	67	PG-13
An Angel at My Table	1990	7.5	95	79	R
Another 48 Hrs.	1990	5.9	20	23	R
Arachnophobia	1990	6.5	93	67	PG-13
Avalon	1990	7.2	86	68	PG
Awakenings	1990	7.8	86	74	PG-13

At the bottom of the table, it says '1 to 100 of 100' with navigation arrows. The footer contains links: 'WATER BOTTLES', 'MORE RANDOM #%%%', 'IDK', 'WHAT', 'IM', 'SAYING', and 'NON OF THESE WORK LOL'.

Screenshot 2

This screenshot shows the same dark-themed movie search interface as Screenshot 1, but with a different search query. The search bar now contains 'STAR WARS'. The results table shows movies related to the Star Wars franchise:

Title	Year	Imdb Rating	Rotten Tomatoes Rating	Metacritic Rating	Classification
Star Wars: Episode I - The Pha...	1999	6.5	51	51	PG
Star Wars: Episode II - Attack o...	2002	6.6	65	54	PG
Star Wars: Episode III - Reveng...	2005	7.6	79	68	PG-13
Star Wars: The Clone Wars	2008	5.9	18	35	PG
Star Wars: Episode VII - The Fo...	2015	7.8	93	80	PG-13
Star Wars: Episode VIII - The L...	2017	6.9	91	84	PG-13
Star Wars: Episode IX - The Re...	2019	6.5	52	53	PG-13
Rogue One: A Star Wars Story	2016	7.8	84	65	PG-13
Solo: A Star Wars Story	2018	6.9	69	62	PG-13

The footer links are identical to Screenshot 1: 'WATER BOTTLES', 'MORE RANDOM #%%%', 'IDK', 'WHAT', 'IM', 'SAYING', and 'NON OF THESE WORK LOL'.

Screenshot 3

The screenshot shows a dark-themed web application for movie search. At the top, there's a header with a home icon, the email address BRAYDAN@BRAYDAN.GMAIL.COM, and links for 'Movies' and 'Logout'. Below the header is a search bar with the placeholder 'Movies Containing'. Underneath the search bar is a dropdown menu labeled 'From Date' with the value '2023' selected. A 'SEARCH' button is located below the dropdown. The main content area displays a table of movie results:

Title	Year	Imdb Rating	Rotten Tomatoes Rating	Metacritic Rating	Classification
Varisu	2023	6.1			N/A
Pathaan	2023	6.4	47		Not Rated
Mission Majnu	2023	7.2			TV-MA
Thunivu	2023	6.2			N/A
Waltair Veerayya	2023	6.4			N/A
Kuttey	2023	6.4			N/A
The Hatchet Wedding Hitchhiker	2023	6.2			TV-MA
Operation Fortune: Rose de gu...	2023	6.4	51	50	R

At the bottom of the table, it says '1 to 8 of 8' and has navigation arrows. The footer contains links: WATER BOTTLES, MORE RANDOM 🎬🍿, IDK, WHAT, IM, SAYING, and NON OF THESE WORK LOL.

Screenshot 4

The screenshot shows a dark-themed web application for movie search, similar to Screenshot 3. At the top, there's a header with a home icon, the email address BRAYDAN@BRAYDAN.GMAIL.COM, and links for 'Movies' and 'Logout'. Below the header is a search bar with the placeholder 'Movies Containing'. Underneath the search bar is a dropdown menu labeled 'From Date' with the value '2018' selected. A 'SEARCH' button is located below the dropdown. The main content area displays a table of movie results:

Title	Year	Imdb Rating	Rotten Tomatoes Rating	Metacritic Rating	Classification
Solo: A Star Wars Story	2018	6.9	69	62	PG-13

At the bottom of the table, it says '1 to 1 of 1' and has navigation arrows. The footer contains links: WATER BOTTLES, MORE RANDOM 🎬🍿, IDK, WHAT, IM, SAYING, and NON OF THESE WORK LOL.

Screenshot 5
